

WHAT IF...

AWARENESS SERIES

Most patients think they are prepared for an emergency, but few actually are.

Emergency Checklist

Patients will be asked to pledge to complete at least one activity on a checklist to better their chances of surviving an emergency unharmed.

Facilities will be encouraged to evaluate, train, and support patients for better emergency preparedness.

THE FACTS

- A Loyola University study of 124 patients found **most unprepared for an emergency**
- More revealing was that **many** of these **patients actually believed that they were prepared**
